Zinc telluride was synthesized in quartz from very pure  
samples of zinc and tellurium. The Debye-Scherrer  
method was used to revise the tabulated values of the  
lattice constant for which the value of 6.085 Å was  
found by extrapolation of the back reflection method.  
The conductivity of zinc telluride as a function of the  
temperature was measured on evaporated thin films.

Extrusion, \*Adhesives, \*Isocyanate plastics.

The invention concerns a method of treatment of poly-  
olefin synthetic resin surface by painting the surface of  
the synthetic resin, which is heated, extruded, film  
and laminated on the surface of the base, with fibre-  
reacting-resin or polyisocyanate resin. (Author)

In order to study the corrosion resistance of aluminized steel in the atmosphere, aluminum, aluminized steel, Al-Cu, Al-Zn, Al-Mg, Al-Si alloy coatings on the steel, galvanized steel, and various electroplated specimens were tested in various locations with different atmos- pheric conditions for a period of two years. It was de- nitely proved that the corrosion resistance of alumi- nized steel was as good as pure aluminum. It was also (Metallurgy--Corrosion, TT, v. 10, no. 11) (over)	Office of Technical Services
